

LITTLE KNOWN FACTS ABOUT SUBMARINES *

Only the cream of Navy manpower is considered acceptable for submarine service. Volunteer applicants are given exhaustive physical and psychological screening before being accepted for training. Those who make the grade are trained in the Submarine School at New London and aboard operating submarines. After graduation from the Submarine School and actual service in submarines, those who pass all tests may wear the Dolphins, insignia of the submarine service.

Per square inch, there is more science packed into a submarine than into any other Warship. Submariners say, "There is room for everything aboard a submarine except a mistake."

A typical modern submarine may require as many as 2,000 working drawings for the more than 7,000,000 items used in its construction. Blueprints from these drawings, if placed end to end, would make a strip 250 miles long.

During their wartime operations, submarines have engaged in some weird marine actions. One undersea craft slugged it out with the infantry and field artillery while other subs destroyed a zeppelin, a bus and a railroad train.

The USS Nautilus steamed 60,000 miles on a lump of uranium the size of a golf ball. A diesel powered submarine would have used 3,000,000 gallons or 300 railway tank cars of oil.

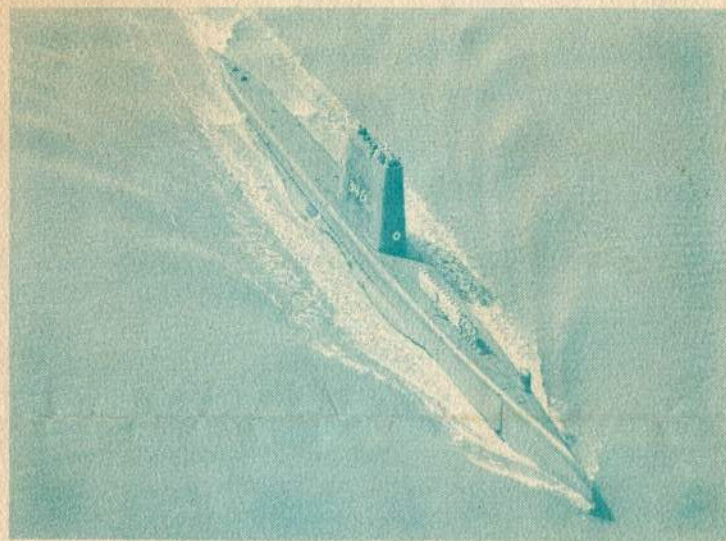

Insignia of the Navy's submarine service is a submarine flanked by two dolphins. Dolphins, or porpoises, traditional attendants to Poseidon, Greek God of the Sea and patron deity of sailors, are symbolic of a calm sea, and are sometimes called the "sailors' friend." In addition to the Dolphins, those World War II submariners who participated in successful combat patrols may wear the coveted Submarine Combat Insignia.

NAVAL COMMISSIONING

The Commissioning Ceremony marks the initiation of a ship of the Operating Forces of the United States Navy. At the moment of breaking her Commission Pennant, USS CORPORAL becomes the responsibility of her Commanding Officer, LCDR Stephen J. O'Leary, USN, who, together with the ship's officer's and men, then has the duty of keeping her constantly ready for any service demanded by our great nation in peace or war.
